

JAKE HELLER, ESQ

Jake Heller co-founded Casetext, the leading legal AI company that develops one-of-a-kind, AI-powered technology for lawyers, in 2013. As a former litigator, Jake knew AI could be used to create technology that would drastically improve the practice of law. With this vision in mind, he set out to establish a client-focused company that always puts the law first.

Today, Casetext is at the forefront of innovation in legal AI, and Jake leads a team of accomplished attorneys and expert engineers in applying advanced AI to the law. Under his direction, Casetext has built solutions enabling lawyers to provide higher-quality representation to more clients, enhance efficiency and accuracy, and gain a competitive advantage.

Over the last decade, Casetext has brought an array of groundbreaking AI-backed legal research, drafting, and search tools to the legal market, including Parallel Search, Cara AI, and AllSearch. Today, over 10,000 law firms—from solos and small practices to more than 50 Am Law 200 firms—rely on Casetext to elevate the quality of their law practice.

Jake has been named to Forbes 30 Under 30 and the Fastcase 50 for his innovation and leadership at Casetext. Prior to leading Casetext, Jake was a litigator at the preeminent global law firm Ropes & Gray. He studied at Stanford Law School, where he was president of the Stanford Law Review, and clerked for Judge Michael Boudin in the US Court of Appeals for the First Circuit.
